

Khalid Boumaghdar

Software Engineer | Full-Stack Developer

khalidboumaghdar07@gmail.com · +212611782921 · Rabat, Maroc · linkedin.com/in/khalidboumaghdar · github.com/khalidboumaghdar · khalidboumaghdar.vercel.app

Profile

Junior Full Stack Engineer with real-world internship experience and a strong portfolio covering Angular, Spring Boot, Laravel, Node.js, Python, and C. Trained through several rigorous programs (1337/42 Network, ALX Africa, ENAA/Simplon, ENSA) with practical web projects, DevOps and AI (LLM function call). Proven ability to deliver complete applications, from Figma design to production-ready code.

Experience

Full Stack Developer — Delivery System

09/2025 – 10/2025

Final year project · ENAA / Simplon—AhmedAlHansali

- Collaborative full-stack co-transport platform connecting drivers and shippers.
- Spring Boot REST API with JWT security, Spring Data JPA, MySQL, Docker; Angular 16 interface with analytics Chart.js.
- Three roles: sender, driver, administrator. Full CRUD with role-based access control.

Angular · SpringBoot · Java · MySQL · Figma · TypeScript

Full Stack Developer — JobConnect

08/2024 – 09/2024

Final year project · ENSAFès

- Comprehensive recruitment web platform with three roles: candidate, recruiter, and administrator.
- MVC + DAO architecture, session-based authentication, application status tracking (accepted / rejected / pending).

Java EE · Servlets · JSP · JDBC · MySQL · Maven · MVC · Bootstrap

04/2023

Web development intern

Agence Urbaine de Fès

- Builds an end-to-end attendance management web application.
- Design of UML diagrams (use cases, classes, sequences) and UI/UX wireframes in Figma.
- Implemented the full stack with Laravel + MySQL + Bootstrap; tested the APIs with Postman.

Laravel · PHP · MySQL · Figma · UML · Postman

PROJECTS

call_me_maybe

05/2026 – Present

Python + LLM + Constrained Decoding — 1337 School / 42 Network

- Function call system built on Qwen3-0.6B (parameter 600M LLM).
Implement constrained decoding: guide the token-by-token model to ensure 100% valid JSON output from natural data the language prompts.
- Pydantic validation, mypy type verification, flake8—production Python standards.

github.com/khalidboumaghdar/call_me_maybe

Python · LLM · Constrained Decoding · Pydantic · JSON · NLP · Qwen3

Fly-in

03/2026 – 05/2026

Drone routing simulation — 1337 School / 42 Network

- Fleet management simulation of autonomous drones, routing of several drones through a network of zones via a modified version of Dijkstra algorithm.
- Manages zone capacity limits, congestion penalties, and priority terrain—minimizing total turns to destination.

github.com/khalidboumaghdar/Fly-in

Python · Dijkstra · Graph Theory · Simulation · heapq · Pygame

A-Maze-ing

02/2026 – 03/2026

Maze generator & solver — 1337 School / 42 Network

- Interactive maze solver and generator using DFS generation and resolution by the shortest path BFS.
- Includes ASCII rendering, configurable grid size, color themes and a network-wide Python publishable package.

Python Modules (01–10)

01/2026 – 02/2026

Python curriculum — 1337 School / 42 Network

- Complete set of 10 graduated Python modules: OOP, decorators, iterators, file I/O, functional programming and error handling.
- Each module is independent, peer-reviewed, and builds on the previous one.

github.com/khalidboumaghdar/All_module_python
Python · OOP · Functional Programming · Decorators · Iterators

DeliveryMatch

2025

SpringBoot+Angular + Docker + JWT — ENAA / Simplon

- Collaborative platform for full-stack co-transport connecting drivers and shippers.
- Spring Boot REST API with JWT security, Spring Data JPA, MySQL, Docker; Angular 16 interface with analytics Chart.js.
- Three roles: sender, driver, administrator. Full CRUD with role-based access control.

github.com/khalidboumaghdar/DeliveryMatch
Spring Boot · Spring Security · JWT · Angular · Docker · MySQL · JPA

JobConnect

2024

JavaEE+MVC+ DAO — ENSA

- Complete recruitment web platform with three roles: candidate, recruiter and administrator.
- MVC + DAO architecture, session-based authentication, application status tracking (accepted / rejected / pending).

github.com/khalidboumaghdar/JobConnect
Java EE · Servlets · JSP · JDBC · MySQL · Maven · MVC · Bootstrap

ALX Files Manager

2024

Node.js+MongoDB+Redis + Bull — ALX Africa

- Download and management of REST API files with token authentication, Bull queue workers, Redis caching and MongoDB storage.

github.com/khalidboumaghdar/alx-files_manager
JavaScript · Node.js · Express · MongoDB · Redis · REST API

EDUCATION

Architect in Digital Technologies

2025 – Present

1337 Coding School (UM6P) — Rabat

Developer Full Stack — Java / Angular / Spring Boot

11/2024 – 10/2025

AhmedAlHansaliDigitalSchool | Simplon—Béni Mellal

Bachelor’s degree in software engineering

09/2023 – 10/2024

National School of Applied Sciences (ENSA) — Fès

Technician specialized in IT development

09/2021 – 10/2023

ETEC—École Nationale Privée des Techniques Économiques et Commerciales — Fès

Bachelor’s degree in Physical Sciences

2021

Lycée Noure — Béni Mellal

CERTIFICATIONS

ALX Software Engineering Certificate

10/2024

ALX Africa — 12-month Software Engineering Programme · Specialization: Back-end

Technical skills

Languages	Python · Java · C · JavaScript · TypeScript · Shell/Bash · SQL
Backend	Spring Boot · Spring Security · JWT · Java EE (Servlets/JSP) · Node.js · REST API · JPA/Hibernate · Laravel
Frontend	Angular 16 · TypeScript · React.js · HTML5 · CSS3 · Bootstrap
Databases	MySQL · PostgreSQL · MongoDB · Redis · SQLite
DevOps & Tools	Docker · Git · GitHub · Linux · Maven · Gradle · Postman · Figma
Concepts	OOP · MVC · Design Patterns · Algorithms · Data Structures · Agile · UML
Other	LLM Function Calling · Constrained Decoding · Pydantic
Languages	Arabic (Natif) · French (intermédiaire) · English (intermédiaire)
